

# AMENDMENTS TO THE CLAIMS

Please cancel claims 8 and 17 without prejudice. Please add new claims 21 and 22.

1. (CURRENTLY AMENDED) A server comprising:

a questionnaire generator for (i) generating a questionnaire comprising (a) one or more questions for determining an expression of risk for an individual and (b) a first number of answer options to each of said questions, wherein said expression of risk concerns at least one of a physical condition of said individual, a mental condition of said individual, and a behavior of said individual, (ii) associating each of said answer options with one of a second number of values representing a level of risk, said second number of values being greater than said first number of answer options and (iii) transmitting said questionnaire from said server to an apparatus, wherein said apparatus is (a) associated with said individual and (b) remotely located from said server;

a database in a storage medium, said database containing model information relating to ~~and indexed by~~ (i) an aspect of care, (ii) said expression of risk and (iii) said level of risk; and  
a profile generator for (i) generating a profile for said individual based on one or more of said aspects of care, responses

20 to said questions, said expression of risk and said level of risk  
associated with said individual and (ii) ~~assigning a subsequent~~  
~~program sending health related information~~ to said individual based  
on said profile, wherein data relating to said physical condition  
of said individual comprises patient information from one or more  
25 medical claims received by said server from a medical claims paying  
organization associated with said individual.

2. (PREVIOUSLY PRESENTED) The server of claim 1,  
wherein said profile of said individual is updated based on one or  
more follow-up responses.

3. (PREVIOUSLY PRESENTED) The server of claim 1,  
wherein (i) said profile further comprises a language of said  
individual, and a current health condition of said individual and  
(ii) said questionnaire generator also tailors said questionnaire  
5 in dependence upon said language and said current health condition  
of said individual.

4. (CURRENTLY AMENDED) The server of claim 1, wherein  
said questionnaire generator further generates a motivational  
profile and a comprehension capacity profile of said individual  
based on said responses to said questions received by said server  
5 from said apparatus on one or more answers.

5. (CURRENTLY AMENDED) The server of claim 1, wherein said health related information ~~subsequent program~~ comprises:

a request for additional responses; and  
educational information.

6. (PREVIOUSLY PRESENTED) The server of claim 5, wherein said educational information is received by said server from an external source.

7. (CURRENTLY AMENDED) The server of claim 1, wherein said data relating to said physical condition of said individual further comprises one or more measurements received by said server from a monitoring device connected to said apparatus.

8. (CANCELED)

9. (CURRENTLY AMENDED) The server of claim 1, wherein said data related to said physical condition of said individual further comprises medical information from electronic medical records received by said server from a services organization  
5 associated with said individual.

10. (CURRENTLY AMENDED) A method for providing customized health information to an individual, said method comprising the steps of:

(A) generating a questionnaire comprising (i) one or more questions for determining an expression of risk for said individual and (ii) a first number of answer options to each of said questions, wherein said expression of risk concerns at least one of a physical condition of said individual, a mental condition of said individual, and a behavior of said individual;

(B) associating each of said answer options with one of a second number of values representing a level of risk, wherein said second number is greater than said first number;

(C) transferring said questionnaire from a server to an apparatus, wherein said apparatus is (i) associated with said individual and (ii) remotely located from said server;

(D) ~~generating a data~~ accessing a database in a storage medium, said database containing model information relating to ~~and indexed by~~ (i) an aspect of care, (ii) said expression of risk and (iii) said level of risk;

(E) generating a profile for said individual based on one or more of said aspects of care, ~~a plurality of~~ responses to said questions, said expression of risk and said levels of risk associated with said individual; and

(F) ~~assigning a subsequent program sending health~~  
25 related information to said individual based on said profile,  
wherein data relating to said physical condition of said individual  
comprises patient information from one or more medical claims  
received by said server from a medical claims paying organization  
associated with said individual.

11. (PREVIOUSLY PRESENTED) The method of claim 10,  
further comprising the step of:

updating said profile after said server receives one or  
more follow-up responses.

12. (PREVIOUSLY PRESENTED) The method of claim 10,  
further comprising the steps of:

registering a language of said individual, and a current  
health condition of said individual in said server; and

5 tailoring said questionnaire to said individual in  
dependence upon said language and said current health condition of  
said individual.

13. (CURRENTLY AMENDED) The method of claim 10, wherein  
said health related information ~~subsequent program~~ comprises:

a request for additional responses; and  
educational information.

14. (PREVIOUSLY PRESENTED) The method of claim 13, wherein said educational information is received by said server from an external source.

15. (PREVIOUSLY PRESENTED) The method of claim 10, further comprising the step of:

generating a report comprising said profile.

16. (CURRENTLY AMENDED) The method of claim 10, wherein said data relating to said physical condition further comprises one or more measurements received by said server from a monitoring device connected to said apparatus.

17. (CANCELED)

18. (CURRENTLY AMENDED) The method of claim 10, wherein said data relating to said physical condition of said individual further comprises medical information from electronic medical records received by said server from a services organization associated with said individual.

19. (CURRENTLY AMENDED) A storage medium for use in a server to communicate with one or more patient devices, the storage

medium recording a computer program that is readable and executable by the server, the computer program comprising the steps of:

5 (A) displaying a plurality of icons of a plurality of questions, a plurality of answers and a plurality of follow-up actions;

(B) receiving a selection to each of a particular question of said questions, a particular answer of said answers and  
10 a particular follow-up action of said follow-up actions from a user;

(C) linking said icons of said particular question, said particular answer and said particular follow-up action; and

(D) converting said linked icons into a questionnaire  
15 ~~subsequent program~~; and

(E) transmitting said questionnaire ~~subsequent program~~ to said one or more patient devices over a communication network.

20. (PREVIOUSLY PRESENTED) The storage medium of claim 19, wherein the computer program further comprises the step of:

defining a position of said particular answer along a risk scale ranging from a low risk value to a high risk value.

21. (NEW) The storage medium of claim 19, further comprising the steps of:

registering a language of an individual; and

tailoring said subsequent program to said individual in dependence upon said language.

22. (NEW) The storage medium of claim 19, further comprising the step of:

simulating said questionnaire prior to said transmission of said questionnaire to said one or more patient devices.
